Summary:

IoT & System Developer with hands-on experience in embedded systems, robotics, product design, and system architecture. Skilled in hardware-software integration, database systems, and prototyping using Fusion 360 and EasyEDA. Recognized for mentorship, leadership, and innovation, with achievements in national hackathons, robotics competitions, and IoT internships.

Technical Skills

Languages: Python, C, C++, HTML, CSS

IoT & Embedded: Arduino, NodeMCU/ESP8266, Raspberry Pi, Edge Computing, IoT Sensors, Relays, Motors, RTC

Tools & Platforms: Git/GitHub, Postman, Slack

Design & Prototyping: Fusion 360, EasyEDA, 3D Printing

Other Skills: Bash scripting(basics), Networking fundamentals, Hardware assembly, Leadership & Mentorship

Education

Samriddhi College, Tribhuvan University – B.Sc. CSIT (2024 – Ongoing)

Arniko International Secondary School & College – +2 Science (2022 – 2024)

Work Experience

IoT Intern - Treeleaf Technologies Pvt. Ltd. (May 2025 – Jul 2025, Kathmandu)

- Worked on embedded systems including Raspberry Pi and Orange Pi for IoT solutions.
- Designed and prototyped circuits using EasyEDA and 3D-printed models with Fusion 360.
- Collaborated in a fast-paced IoT environment, improving problem-solving and teamwork skills.

Team Captain & Mentor -Team Arniko Robotics (2022 – Present)

- Led the team to win 1st Prize (Dynamic Section) at Mechtrix 2079.
- Mentored students in robotics, IoT, and automation, guiding them in events like Technorian, Orbit Engineering Expo, and Locus 2025.
- Represented Nepal at TechFest IIT Mumbai, India

Student Trainer – Arniko International College (Aug 2024 – Sep 2024)

- Trained students in Computer Fundamentals (Office, OS and Networking)
- Introduced concepts of SDLC, Information Security, and Emerging Technologies (AI, VR, IoT, E-commerce).

Campus Director – Hult Prize 2025/26 (Samriddhi College)

- Leading campus-level social innovation and entrepreneurship initiative, connecting students with mentors and investors.

Achievements

- Most Innovative Project KU EEPEX Hackathon 2025 (IoT & Product Innovation)
- Mechtrix 2079 (Dynamic Section, Robotics)
